PROUDLY PART OF

AUSTRALIA'S PIONEER
CYBER EMERGENCY RESPONSE TEAM

AUSCERT MEMBERSHIP SERVICES

Incident Support

Our highly skilled team of security analysts will help you to detect, interpret and respond to attacks from across the globe. Whether you're facing an incident or in need of guidance, our team is here to assist you via email, Slack or our 24/7 Member Hotline.

Phishing Take-Down

Drawing on our strong international CERT relationships, we have a high success rate in delivering takedowns for phishing and malicious domains.

Security Bulletins

Receive up to date and consistently formatted security bulletins across major platforms and vendors, streamlining security patching. Bulletins are scored for severity and include patch/upgrade and mitigation recommendations.

Security Incident Notifications

Receive customised composite security reports tailored to your organisation based on your IPs and domains. Notifications include details of the threat/vulnerability along with recommended mitigation, as observed through our threat intelligence platforms.

Early Warning SMS

Receive SMS alerts when there is a high impact vulnerability that is of the utmost importance which your organisation should consider acting on swiftly.

Sensitive Information Alert

Alert notification provided via email when sensitive materials, such as leaked credentials, are found online by our analyst team which specifically targets your organisation.

Malicious URL Feed

This Australian-based feed contains a list of active phishing, malware, malware logging or mule recruitment websites which can be added to your firewall blacklist and SIEM to help prevent compromises to your network.

AusMISP

Strengthen your cyber resilience through collaborative threat intelligence sharing. The AusCERT MISP service provides validated threat indicators acquired from trusted communities and organisations.

ADD-ONS

AusCERT Training Courses

Enhance cyber security knowledge within your organisation with our exceptional one-day training offerings. Our courses are affordably priced and exclusive to AusCERT Members.

- Intro to Cyber for IT Professionals
- Cyber Security Risk Management
- Incident Response Planning

AusCERT is a not-for-profit Cyber Emergency Response Team based in Australia. We exist for the greater good of our members by providing proactive and reactive advice and solutions to current threats and vulnerabilities.
